* Most states educational requirements for obtaining the CPA license/certification are 150 semester hours of education within a prescribed accounting coursework curriculum. The University's Master of Accountancy (MAcc) program meets the educational requirements for professional CPA licensure/certification in Pennsylvania, New York, and New Jersey for students with prior accounting and related coursework. Students enrolled in the MAcc program, without prior accounting and related coursework, are also unlikely to meet this educational requirement through completing the MAcc program. Such students may need to complete additional required course(s).

[Click here](#) for more information about CPA licensure in Accounting programs.

** Note program will change name to Clinical Rehabilitation Counseling effective fall 2022.

This listing reviewed annually.

February 2022.
